

# Kid Holding Box

for dehorning and vaccinating.

## Materials list:

### Wood:

¼" plywood: 2 pieces 24" x 16"  
1' x 6" pine lumber: 7'  
2 x 4 block 5" long

### Hardware:

2 strap hinges  
1 latch  
2" screws  
1" screws

Cutting list for lumber			
Part	How many	Lumber	Dimensions
Sides	2	¼" plywood	24 x 16"
Ends	2	1" pine	5" x 15 1/4"
Top	1	1" pine	5 ½" x 24"
Bottom	1	1" pine	5" x 24"
Belly support	1	2x4	5" long

A head opening must be cut in the top of one end. It should be U-shaped, 3" wide at the top and 4" deep. Take the cut out piece and attach it to a triangular piece of wood. Drill holes through the triangle and screw it to the box with 2" screws, just below the head opening as a chin rest.
